Quiz 2 - One-Pager

Types of Research:

- Quantitative: based on numerical values with a statistical analysis through a deductive process

- Qualitative: based on text with an open-ended analysis through an inductive process

Zotero:

- Citation creator; collects all of the information necessary for citations

Things to consider for Data Analysis:

1) Availability

2) Data cleanliness

3) Good documentation

Bias in Research:

- Publication Bias - the publication of positive results over negative results

- Reporting Bias - not displaying every result even if it was present

- Confirmation Bias - over or under exaggerating results

- Recall Bias - the incorrect results due to lack of memory
